

Auger Extensions

The new range of TEBCO Auger Extensions are built for strength and ease of use. This range of products are engineered for everyday use in the residential and commercial drilling sectors.

The TEBCO Advantage:

- ◆ 75x75 (Standard) high strength cast drive box.
- ◆ Easy fit design
- ◆ High quality steel
- ◆ Telescopic design
- ◆ Manufactured in AUSTRALIA to the highest engineering standards, with quality being our first priority.
- ◆ All Drive Box Sizes available (75x75, 65x65, 100x100)

Auger Extensions	
Model No.	Length
TAE8	800
TAE10	1000
TAE12	1200
TAE14	1400
TAE16	1600
TAE18	1800
TAE20	2000
TAE22	2200
TAE26	2600
TAE30	3000

Additional and Replacement Parts

These items are renowned for their durability and wear resistance. A Full range of flights of additional loose flights drive heads are available, enabling you to do your own repairs when time does not permit a return to our workshop.

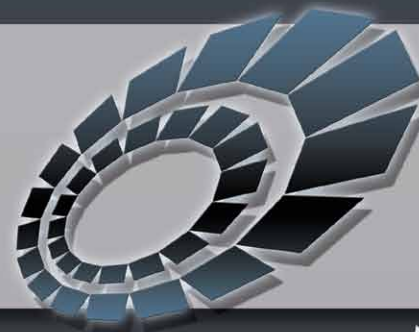

Additional or Replacement parts	
Item No.	Description
TH1A	High Strength Auger Head
TF300	300 Auger Flights
TF400	400 Auger Flights
TF450	450 Auger Flights
TF600	600 Auger Flights

T4 Series

The New T4 series auger by TEBCO is designed for the drilling contractor. With 35 Years' experience in the field the TEBCO staff is translating experience into your advantage. This Product is engineered for everyday use in the residential, commercial and industrial/Infrastructure drilling sectors.

The TEBCO Advantage:

- ◆ Dual flights at the ultimate pitch for drilling and hole cleaning
- ◆ Flights are evenly spaced for efficient dirt removal.
- ◆ Heavy duty flights are wear resistant and therefore minimize auger downtime.
- ◆ Unique Cutting head with patent pending blade tooth design allow the operator to clean the holes perfectly reducing the need for a separate cleaning bucket.
- ◆ Easy removal and replacement of teeth.
- ◆ Heavy duty drive pipe for increased torque loads and wear resistance.
- ◆ 1 Year Warranty (covering manufacturing defects, excludes wear parts and misuse)
- ◆ Manufactured in AUSTRALIA to the highest engineering standards, with quality being our first priority.
- ◆ Replaceable teeth for both clay and rock applications.

Beaver Tooth System

The Beaver Tooth system is TEBCO's patent pending cutting edge blade option for professional clean holes in all ground types. This Product is engineered for everyday use in the residential and commercial drilling sectors. Features of this range include:

- ◆ No Special tools required to fit or remove
- ◆ Outstanding cutting and hole cleaning ability
- ◆ Choice of four variations for all earth drilling applications

- TB-1** Light to moderate ground conditions
 - High strength and abrasion resistance
 - Unique dual cutting edges. (When one side wears you flip tooth)
 - High Quality BisAlloy Steel
- TB-2** Standard Conditions
 - Sharp cutting edge for increased drilling efficiently
 - Tungsten carbide inserts for greater abrasion resistance
 - High Quality BisAlloy Steel
- TB-3** Heavy Conditions
 - Unique dual cutting edges. (When one side wears you flip tooth)
 - High Quality BisAlloy Steel
 - Extremely Impact resistant
 - For use in rocky soil
- TB-4** Heavy Conditions
 - High Quality BisAlloy Steel
 - Serrated Tungsten carbide inserts for effective grinding of rock, concrete etc.
 - Longer Lasting Durability

TB-2

TB-4

Centre Tip (Pilot Bits)

The TEBCO style Centre tip is unique to TEBCO. This gives superior drilling efficiency and prolongs the life of your auger at top drilling condition.

Advantages

- ◆ Cast from High strength steel and through hardened for longer life.
- ◆ Available with Tungsten carbide Inserts.
- ◆ Shaped to minimize wear and keep your auger drilling efficiently.

Centre Tips (Pilot Bit)		
Item No.	Application	
	Soil, Clay, Shale. (Class 5)	Soft Rock (Class 4)
