TRIPCO
Solutions through experience

The TRIAD Series Auger is a precision engineered auger designed and developed by TEBCO. The revolutionary design has 3 cutting edges for increased drilling efficiency. This auger range is designed for the most severe conditions known to man.

The quality, drilling efficiency and increase consumable life set a new benchmark for the rock and power drilling industries.

The TRIAD advantage:

-  Increased consumable life as all wear is on the Tungsten carbide inserts.
SAVE \$\$\$\$\$
-  Enhances the self-sharpening characteristics of bullet and rock teeth.
SAVE TIME
-  Auger stays straight without the tendency to skew off.
SAVE HASSLES
-  Increased drilling efficiency.
GIVE YOUR BUSINESS THE EDGE
-  Increases the capabilities of your machine.
INCREASE YOUR WORK PROSPECTS

With 35 years' experience in competitive drilling and dedicated engineering staff TEBCO can design any type of auger or drilling accessory. A simulation and load test as well as a visual photorealistic picture of the item can be produced to the client prior to order or delivery. **GET THE ITEM AS YOU NEED IT FIRST TIME: EVERY TIME**
